(A \$14.00 VALUE)	\$145/set	

Non-Glare vs. High-Gloss Finish:

The high-gloss version is coated with a U.V. (polyester) coating on both sides of the card. It provides protection/extended life to the sheet, but **DOES** allow glare from room lights. The glare may hinder players with low vision. If the majority of your players are low-vision, consider the non-glare option.
